

WORLD CANALS CONFERENCE: JUNE, 1, 2022

BY TRAIN TO THE POST-MINING
LANDSCAPE:
FERROPOLIS AND LAKE GREMMIN

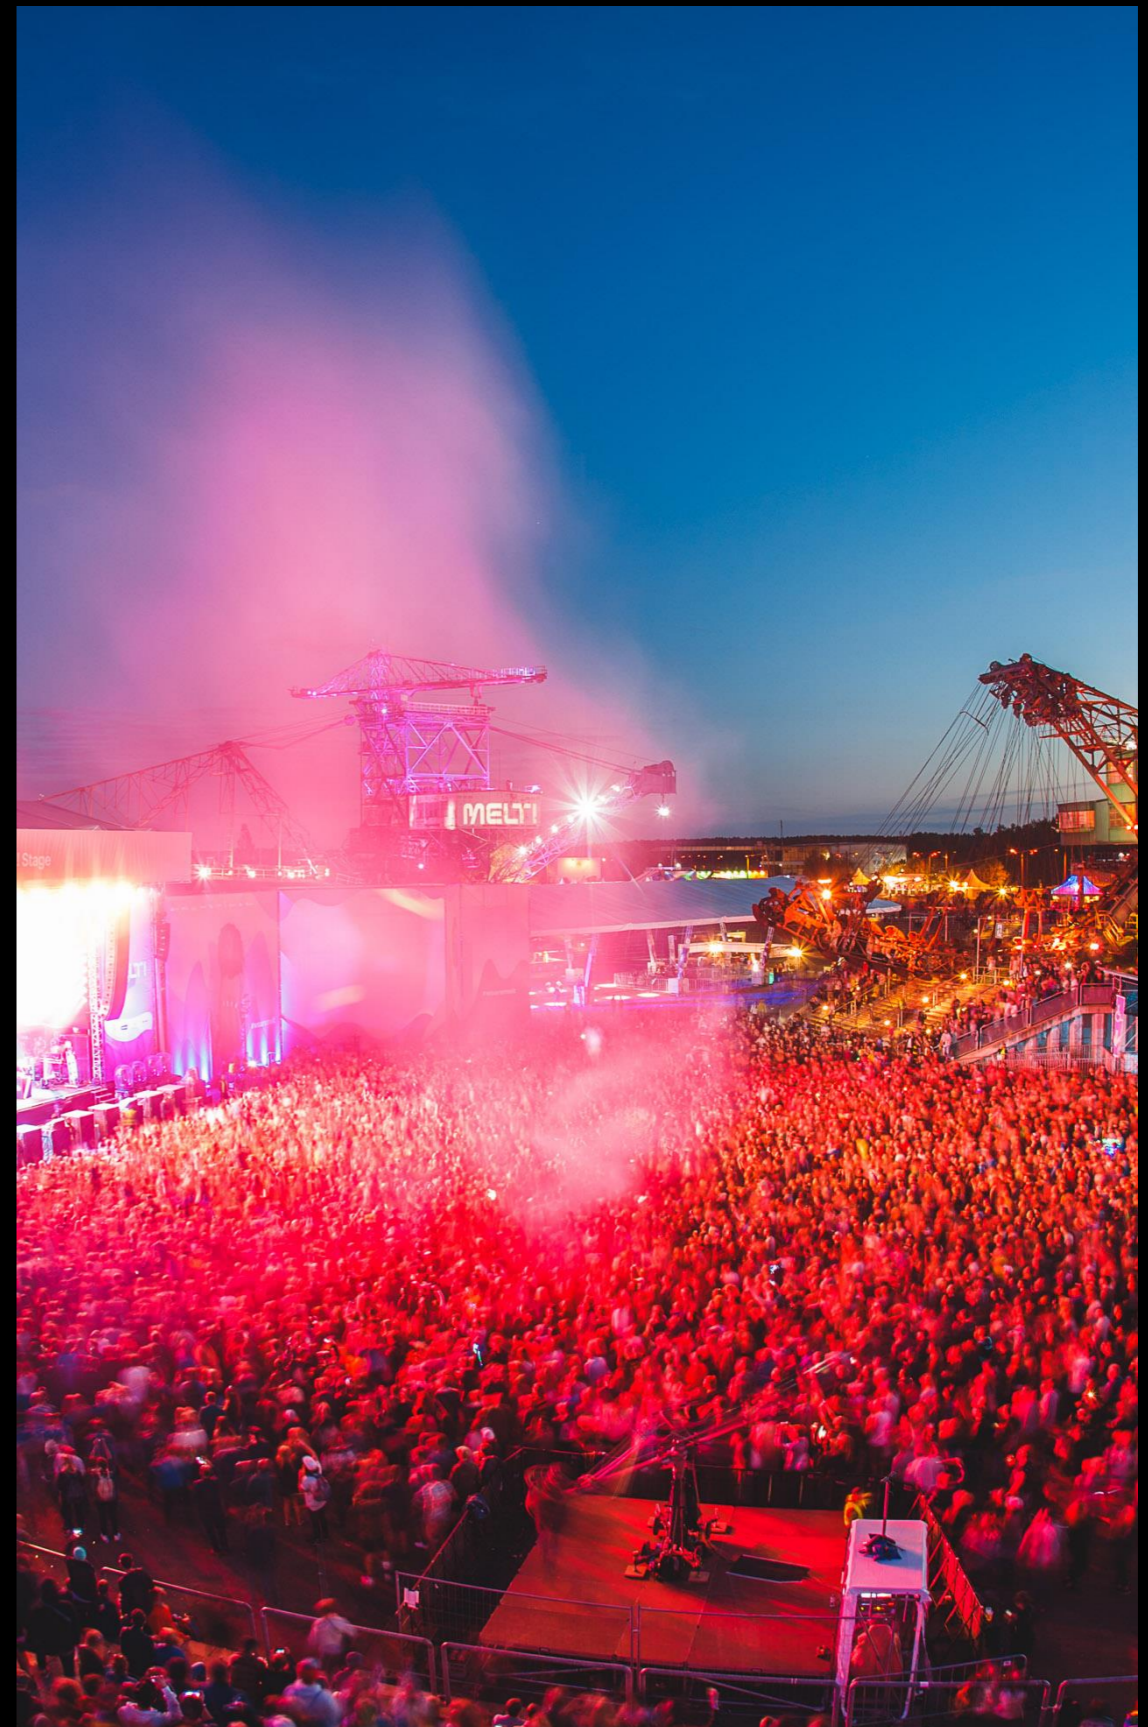

ERs 400 Bg 197

The place: FERROPOLIS

In the Ferropolis open-air museum, you will embark on a journey into the past and into the future. Ferropolis, the city of iron, stands for energy and technology. Today, grey everyday working life breathes the most colourful culture. The "city" touches the spirit and generates emotions.

Five heavy excavator giants, each with its own history, on a peninsula in the middle of Lake Gremmin, which covers the desert of an open-cast mine. A young landscape of contrasts. A future-oriented, haunting present that deliberately plays with its past.

START
LEIPZIG MAIN STATION
